NEW: PATENT STRUCTURES

Scan patents differently.

Get a notable structure alongside data annotations within our curated patent feed, validated by industry-trained Ph.D. scientists. Another step toward intelligence at your fingertips.

STAT6

SELECTED 52 / 5857 RESET

Patent No.	Target/MoA	Therapeutic Area(s)	Originator	Structure	Annotation
WO2026188071	STAT6 degrader	dermatology, pulmonology, gastroenterology, immunology, hematology, oncology, cardiology, neurology, hepatology, endocrinology, infectious diseases, genetic diseases, musculoskeletal diseases	Kymera Therapeutics		365 examples; cmpd 1-3 degraded STAT6 in A549 STAT6-HiBiT cells with $IC_{50} < 1$ nM and $D_{max} > 90\%$ after 24 hours
WO2026183251	STAT6 inhibitor	pulmonology, dermatology, otorhinolaryngology, gastroenterology, rheumatology, immunology	Enanta Pharmaceuticals		10 examples; cmpd 3 inhibited STAT6 SH2-domain peptide binding with $FPIC_{50} < 1$ μ M and IL-4-driven STAT6 signaling in HEK-BLUE reporter cells with $EC_{50} < 0.1$ μ M
WO2026183252	STAT6 inhibitor	pulmonology, dermatology, otorhinolaryngology, gastroenterology, rheumatology, immunology	Enanta Pharmaceuticals		6 examples; cmpd 1 inhibited STAT6 SH2-domain peptide binding with $FPIC_{50} 1-10$ μ M and IL-4-driven STAT6 signaling in HEK-BLUE reporter cells with $EC_{50} < 0.1$ μ M

Filter by target, therapeutic area, originator, or data annotation

WHY WE BUILT IT

Patents are tedious to source and track. **Not anymore.**

DISCOVERY TEAMS CAN NOW

-  Make faster decisions
-  Analyze chemical matter
-  Benchmark competitors
-  Find new inspiration

DIVE DEEP ON THE PLATFORM

01 

Filter the feed

By target, therapeutic area, originator, or curated annotations.

02 

Copy the SMILES

Take the notable structure straight from the table. Paste in Molecule Search.

03 

Go deeper in Molecule Search

Modify it and find related clinical compounds, approvals, and disclosures.
